Wave Pool-Vacuum / Tsunami Pool

The vacuum wave is also called the tsunami wave. It collects the vacuum through the vacuum system, and instantly controls the vacuum valve to open the wave. It can make a continuous wave of 1.5 meters and a huge wave of up to 3 meters. The area of the vacuum wave pool is generally 5000. Between ~20000 square meters, it can accommodate thousands of people at a time, suitable for all kinds of people.

Wave Pool-Pressure

Wind pressure wave is also called aerodynamic wave. The artificial wave generator consisting of centrifugal blower, air compressor and special pipeline system can control the wave height, wave interval and waveform. It can make waves of 0.9~1.2 meters, and can display more than ten waves, intelligent transformation, and blue waves.

Tidal River

Using the technology of hydraulic pressure and air pressure, the whole drifting river dances, and suddenly the big waves rush to the tourists. Hold tight, float, hold your breath, close your eyes, enjoy the washing of the wind and waves, wash away the troubles of the tourists, the tiredness of the body, and feel the excitement and excitement.

Lazy River

The Drift River is a ring-shaped river with lengths ranging from 100 to 1000 meters. It is beautifully landscaped along the river and has strange rock formations. In addition, various water-cooling columns, interactive water-jet cartoons and other entertainment landscape elements are set up to create different experiences of black hole whirlpool and tropical rain forest.

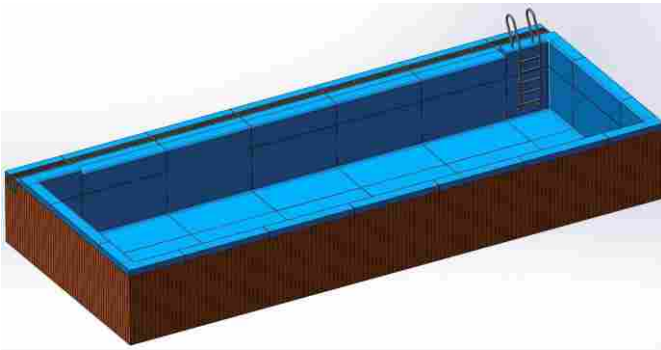

Surf Simulator

Surfing, this latest and most dazzling lifestyle has never been geographically restricted and benefited the public. Whether it's a teenager with three or two friends or a family trip, the Surf Simulator is the best choice. The most popular surfing experience in history will naturally turn into income.
